

## **Argument in Favor Of Measure B**

Measure B is an investment in classrooms and facilities at Cupertino, Fremont, Homestead, Lynbrook and Monta Vista High Schools. Measure B will raise the local bond funds needed to continue to renovate and modernize the high schools serving our communities.

Measure B funds will be used to:

- Create a dedicated Technology Fund that will allow the district to upgrade and maintain classroom computers and related technology;
- Build new science labs;
- Construct the new classrooms needed to avoid overcrowding;
- Replace aging heating, lighting, plumbing and electrical systems;
- Improve energy efficiency at each high school;
- Create classrooms and labs designed for career and technical education classes that supplement traditional college preparatory courses;
- Upgrade and improve athletic facilities and fields;
- Improve campus safety and security;
- Upgrade and improve emergency communications systems;
- Add solar power and make the dollars now spent on utility bills available to support classroom programs.

Measure B provides for strict accountability. Measure B funds will be audited annually and reviewed by an independent Citizens' Oversight Committee. All Measure B funds will be spent locally to benefit this and future generations of high school students.

The cost is reasonable. Measure B will cost property owners an average of \$12 per \$100,000 of assessed – not market – value.

Our high schools have been named Distinguished Schools by the state and have won national recognition as some of the best in the nation. As an investment in the quality of our high schools, Measure B will maintain and strengthen the value of all homes and businesses in the district.

Please join us in voting Yes on Measure B, making an investment in the outstanding high schools that serve our community: Cupertino, Fremont, Homestead, Lynbrook and Monta Vista. For additional information, visit [www.AboutMeasureB.com](http://www.AboutMeasureB.com).
